MOTIVATION

I want to provide convenience in people's lives through the products that I make. I am looking for a job where I can enhance my skills and learn new technologies through problem solving. I am very good at learning new technologies to implement them in current task/problem solving.

EXPERIENCE

Internship - Sealdah Suburban, Indian Railways,
Evaluation of driving technique using Speed Time Chart,
- Worked with the IT cell, Eastern Railways. Processed data taken from the tracker of locomotives.
- Used MATLAB to do the data processing and visualization, then implemented it to a website as my personal project.
